

# WorldStage

## A DIGITAL EVENT EXPERIENCE LIKE NO OTHER

Digital Oasis is a new online event hosting solution from WorldStage purpose-built for the live event production community to provide the foundation for successful digital events. With Digital Oasis, you get an end-to-end production experience that offers streamlined planning, broadcast-quality production value and a world-class virtual event ecosystem -- all from the safety of the cloud. Production companies, agencies, creatives and end clients can build their virtual event, presentation or show with confidence knowing that the technology supporting them is rock-solid and ready to deliver.

Whether your event is a single performance, a keynote with 10 breakout rooms, or a multi-day extravaganza, Digital Oasis brings together all of your content in a traditional production workflow you know and trust.

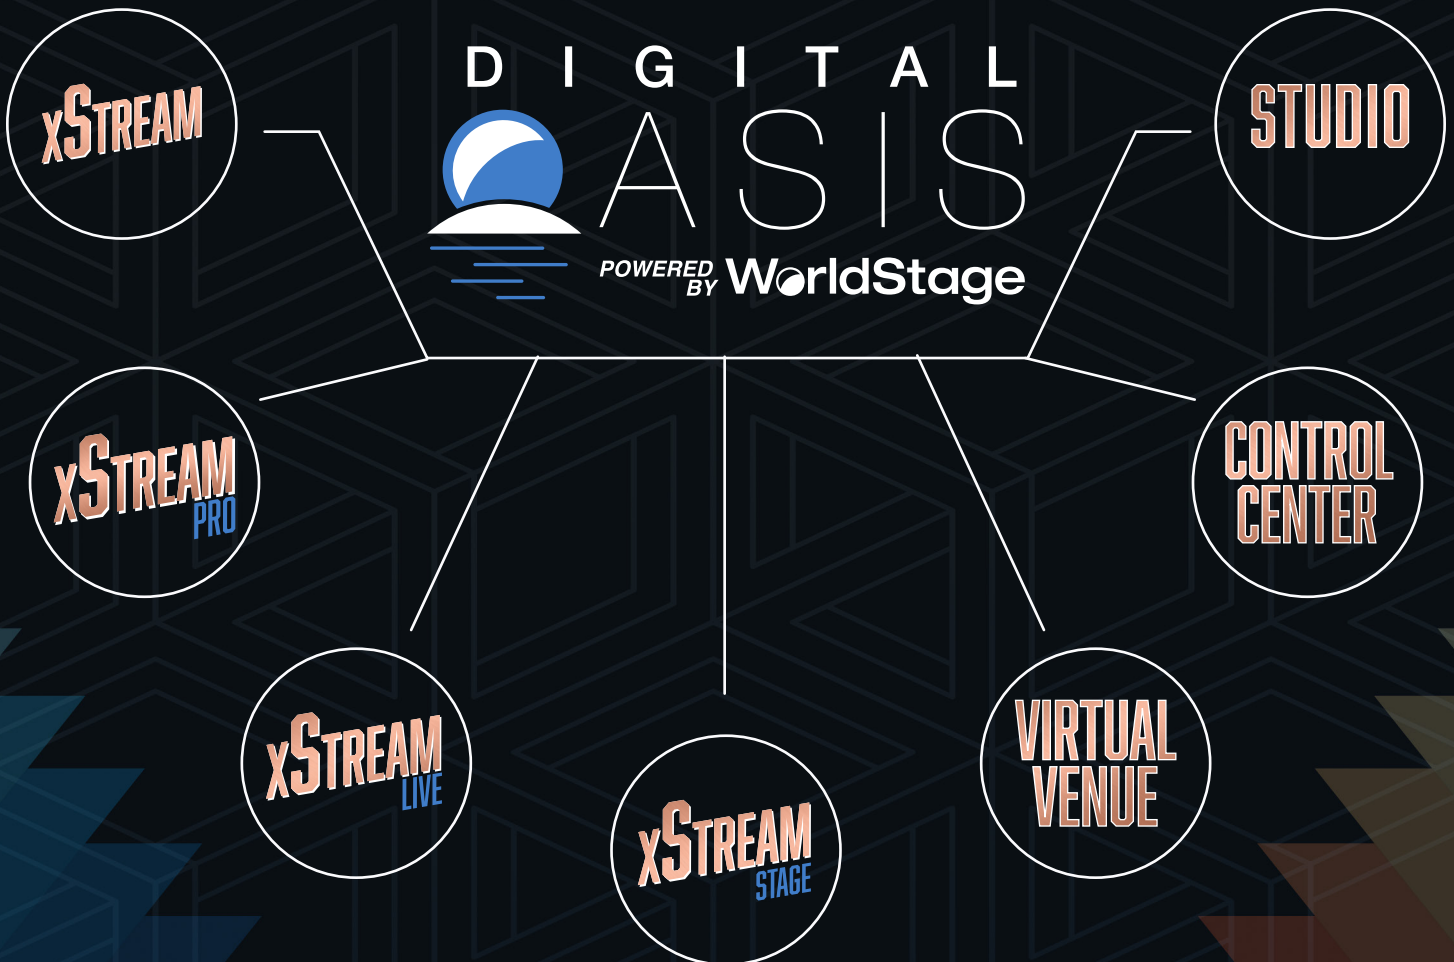

Presenters present from anywhere using easy-to-use, pre-configured remote presenter kits or have the option to present from a stage or studio location of their choosing. Rehearsals happen, Stage Managers call live cues, and Operators push the buttons that make your show happen.

All of this takes place within the Digital Oasis environment... think of it like a pre-built, virtual "venue" ready to host your next digital event.

**RELIABILITY:** DELIVERING EXCEPTIONAL BROADCAST QUALITY VIDEO AND AUDIO

**FLEXIBILITY:** EVENT PRODUCERS DESIGN THEIR EVENT THEIR WAY

**CONFIDENCE:** ENGINEERED TO SUPPORT A TRADITIONAL PRODUCTION WORKFLOW

*Designed And Built By Production People For Production People*
